Did you know…
What's new in version 8.3?

NOTE: For complete details, please see the document *"What's New in Version 8.3?"* that was included with your installation disc and is also contained in pages **1-2** to **1-5** of the updated Software Guide.

SOFTWARE GUIDE:

- **Links Added:** Page 1-5 of the Software Guide now includes links to the ACT 1 Systems website, including relevant information and files such as the new Quick Start Guide and documentation of What's New in historical software versions.

SOFTWARE UPGRADES:

- You can read about all upgrades contained in the Version 8.3 release by referencing pp. 1-2 to 1-5 of the Software Guide. New features include support for Digital Stations, the ability to expand Composite Lineups within Affiliate System, improvements to the Lineup Errors report, the ability to show a "Combined" Lineups column in the MSL report, and the removal of default station limits in the Ranker, Trend, and Composition Research Reports.

Have any questions?

You may call ACT 1 Systems at **(818) 347-6400** for unlimited free **phone training** during our regular business hours from 7:30am – 5:00pm Pacific Time. Call us as often as you need to get answers to your questions, no matter how complex or trivial. You may also send an **e-mail** to ACT 1 Systems any time for assistance: contact Alexis at adoria@act1systems.com or Eric at erosenberg@act1systems.com.
