Did you know...
What's new in version 8.5?

ACT 1 Systems released software version **8.5** on **March 6, 2012** for client downloading and installing. For complete details of all enhancements, please see *"What's New in Version 8.5?"* on pages **1-2** to **1-6** of the updated Software Guide.

LINEUP MANAGER:

- When the "Lineup Export Dialog Box" displays a confirmation dialog, users can now copy the list of lineups that were included in that export file and paste that list into an e-mail.

- When selecting multiple lineups from within a relevant Lineup Manager dialog, users will not be able to accidentally clear those selections. Users will now have to clear a confirmation dialog.

- Users can now cancel an import of lineups while in progress.

- The "Composite Management" dialog includes enhancements, such as a 'Cancel' button that can cleanly stop a lengthy composite building operation, and a 'Repeat' button in the "Merge Instructions" dialog that appears when you create a new composite or modify an existing composite.

- The "Batch Copy" feature has been improved, including adding a 'Remember This Action' checkbox that will allow users to manage lineup code conflicts more efficiently when the software asks how to proceed when multiple conflicts are encountered.

- The Lineup Directory Report now gives users the ability to search lineups with stored schedules for stations that are missing a time.

- The Call Change Report can now display the MSL station ID# and the related ID# used by MStreet, BIA, or Media Framework.

- The Convert Clearances dialog has been enhanced with some new options and features.

SITE MANAGER:

- We enhanced the folder selection method in the Install/Remove tab and added a 'Browse' button so one can easily find an alternate folder not shown in the drop-down list.

Have any questions?
