

# Did you know... What's new in <u>version 8.9</u>?

ACT 1 Systems released software version **8.9** on **February 26, 2014** for client downloading and installing. For complete details of all enhancements, please see *"What's New in Version 8.9?"* on pages **1-2** to **1-6** of the updated Software Guide, or go to <a href="https://www.act1systems.com/wnvercurandhist">www.act1systems.com/wnvercurandhist</a>.

### **MULTI-WEEK CUME CALCULATION:**

 Nielsen Audio provided ACT 1 with a revised and expanded table of multi-week cume adjustment factors, so we've updated our audience calculations to make use of this updated table. [For more information, see Software Guide page 6-4.]

#### **AFFILIATE SYSTEM:**

- We added new optional report columns called "Home DMA" and "Commercial Status." These new columns can be used as a display column in all applicable Affiliate System reports, and may also be used for grouping and sorting in the Audience and Trend reports. Commercial Status is also a station selection criteria within reports. [For more information, see Software Guide pages 2-105, 2-130, 2-146, 2-193, 2-194, 3-5, 3-7, 3-16, 3-18, 3-68, 4-18, 4-32, 4-43, and 4-52.]
- A new Network Ranker report option allows users to specify a "Top N" value. If used, the report will only show stations that have a rank better than or equal to the specified Top N value within each market. [For more information, see Software Guide page 2-93.]

#### LINEUP MANAGER:

- When importing a lineup from a text file, the ACT 1 import tools have improved handling of multiple questionable stored times of the same daypart. [For more information, see Software Guide page 3-28.]
- The Call Letter Change report can now show Format and Owner columns. [For more information, see Software Guide page 3-78.]

## Have any questions?

You may call ACT 1 Systems at (818) 347-6400 for unlimited free phone training during our regular business hours from 7:30am – 5:00pm Pacific Time.
